## HOOK REST

This holder is used to position the carabiners of a fall arrest line - either when only one arm is used or when the entire system is temporarily not in use.

It can be quickly integrated into the horizontal loops of the shoulder straps of the following harnesses without tools: GRYPHON, XARRIER TOP Y, WORK TEC 140 and WORK TEC. The holder keeps the connecting elements securely within reach without disturbing the user at work - even large carabiners remain stable in position without twisting.

When a load of several kilograms is applied, the connecting element releases automatically so as not to impair the function of the energy absorber in an emergency. The breakaway force is designed to ensure safe operation even in the event of a fall or accidental snagging. Attention: Not a PPE product - not suitable for hanging tools.

### FEATURES

Colour:	Orange
---------	--------

### DIMENSIONS

Rope length:	0.00 m
--------------	--------

### MATERIAL

Material:	Polyamide
