Manufacturer Confirmation - supaHERO Product IP68
KS-8001(-0S/DS)

We, **KSE LIGHTS GmbH**, hereby confirm that our product, **supaHERO**, has successfully undergone testing according to the EN-60529 standard and complies with the **IP68** protection rating.

The said tests, conducted in our in-house laboratory, involved fully submerging the product in water to a depth of **100 centimeters** for a continuous period of **14 days**. Upon careful execution and evaluation of these tests in line with the requirements of the EN-60529 standard, we can confirm that the supaHERO product meets the specified conditions and thus adheres to the IP68 protection standard.

We emphasize that these tests and the related assessments were conducted with utmost diligence and precision to ensure the quality and reliability of our supaHERO product.

For further information or if there is a need for additional certifications, please do not hesitate to contact us.

IP68

- The first digit "6" indicates the level of protection against solid particles. A rating of 6 signifies that the device is dust-tight, offering complete protection against dust and other particulate matter.
- The second digit "8" signifies the level of protection against liquids. A rating of 8 indicates that the device is capable of being submerged in water (usually up to 1 meters, but the exact depth can be specified by the manufacturer) for prolonged periods without suffering harmful effects.
